

# NEURODIVERSITY

Neurodiversity is the concept that **neurological differences between people** should be recognised and respected. Instead of using terms like 'dys - function' 'dis - abilities' & 'dis-orders' neurodiversity is an enabling term that takes into account neurological differences. Neurodiversity - is not one size fits all. We are all different and neurodiversity celebrates difference.

**I personally love the term neurodiversity**, as many children I meet don't have official "labels" yet, but their family, educators, etc. notice their different way of engaging in learning. **My passion is to ensure these children get the most out of their educational settings** by putting in place strategies and accommodations that support their specific learning style.

One way to do this is to put in place strategies to **'make learning fun'**.

# WEBINAR

Join me for my new **FREE** webinar to hear me discuss more about neurodiversity and making learning fun. This new webinar is aimed at the early years, but I am sure you will find valuable tips for children at any age and stage.

## STRATEGIES TO TEACH CHILDREN WHO LEARN AND ENGAGE DIFFERENTLY IN EARLY CHILDHOOD

### What you will learn?

- ✔ Understanding Neurodiversity
- ✔ How to adapt activities to meet ALL children's learning needs
- ✔ 5 Key Ways to make Learning Fun
